

Resource Department

Maternal Child Float Registered Nurse

Join a team that thrives on flexibility and impact!

•**Start of Your Shift:** Receive your assignment—every day brings something new!

•**Floating:** You may float to more than one unit during a single shift.

•**Team Variety:** Work alongside different frontline staff each day, building relationships across the hospital.

•**Dynamic Environment:** Some days you'll be the only Resource RN on a unit; other days, you'll collaborate with multiple Resource colleagues.

•**Units:** Based on your skill and ability we will determine which of the following units you will support.

The available units are: Pediatrics, NICU/Neonatal Transition Unit, Mother Baby, Labor & Delivery.

“Every day is different! The opportunity to meet/work with other nursing staff and learn from their specialties is incredibly refreshing too!”

- **Amber R, Staff RN II**

“I love working with new parents and all the teaching that is involved in caring for a newborn but I also love working Peds and helping families through a difficult time of having a child admitted for medical reasons. I love being able to use my med surge skills. The best part of float nursing is that I get to experience them all.

- **Carina M, Staff RN II**
